

Name:

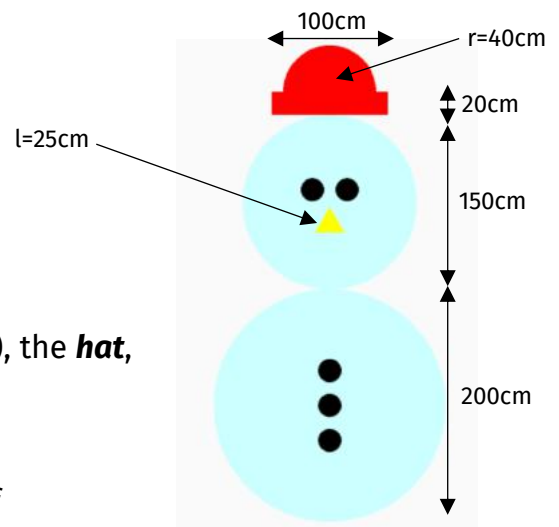

Date:

The Snowman

Create a snowman.

Hints:

- First define the various components: the **ice_color**, a single **eye** (=button), the three **buttons**, the **face** (eyes and nose), the **hat**, the **head**, and the **belly**
- Then, put the three main components (hat, head, and belly) together
- Attention: one eye (button) is composed of two concentric circles

If you want to personalize your snowman, you can vary the colors, the dimensions, and the form of the hat.
