

Name:

Date:

Clock

Create a clock for any given hour and minute.

Recommendations:

- Define the ring:
`ring_color = rgb_color(125, 125, 125)`
`ring = ....`
- Define the "hand" function:
`def hand(...):`
Define the hour and minute hands:
`hour_hand = ....`
`minute_hand = ....`
- Define the "hands" function:
`def hands(hours, minutes):`
- Define the complete clock:
`def clock(hours, minutes):`
